

First Annual DOE Joint Genome Institute User Meeting

The U.S. Department of Energy Joint Genome Institute (DOE JGI) invites its users, collaborators, as well as all other interested scientists, to attend the first annual DOE JGI User Meeting. This international gathering of researchers with an interest in sequence-based science will offer two and a half days of state-of-the-art scientific presentations, informatics tutorials, and poster sessions. Don't miss this unique opportunity to hear about great sequence-based science and new technologies, as well as learn about the DOE JGI user programs. Sessions and posters in the fields of microbial genomics, microbial communities, basal-eukaryote genomics, and large-eukaryote genomics will be presented. The newest version of the Integrated Microbial Genomes (IMG) data analysis system will also be presented.

March 29 – April 1, 2006

Embassy Suites Hotel &
The DOE Joint Genome Institute
Walnut Creek, California

Agenda

WEDNESDAY,
MARCH 29

4:30–6:30 p.m.
Registration and
welcome reception

6:30–8:00 p.m.
Opening remarks and
keynote address

THURSDAY, MARCH 30
& FRIDAY, MARCH 31

8:00 a.m.–7:00 p.m.
Plenary presentations,
poster session, tours
of DOE JGI Production
Genomics Facility

SATURDAY, APRIL 1

9:00 a.m. – 12:00 p.m.
IMG workshop

Partial List of Confirmed Speakers

Ginger Armbrust	University of Washington
Penny Chisholm	MIT
Dan Cullen	USDA
Edward DeLong	MIT
Joe Ecker	Salk
Jonathan Eisen	TIGR/UC Davis
Drew Endy	MIT
Arthur Grossman	Carnegie Institution
Dawn Holmes	University of Massachusetts
Richard Harland	University of California, Berkeley
Phil Hugenholtz	DOE JGI
Lonnie Ingram	University of Florida
Samuel Kaplan	University of Texas, Houston
Jared Ledbetter	Caltech
Kenneth Nealson	University of Southern California
Gerald Tuskan	Oak Ridge National Laboratory
Rachel Whitaker	University of California, Berkeley
John Willis	Duke University
